

SOCIAL SECURITY

The Commissioner

December 19, 2016

The Honorable Joseph R. Biden, Jr.
President of the Senate
Washington, DC 20510

Dear Mr. President:

We enclose our report on continuing disability reviews (CDR) for fiscal year (FY) 2014. In FY 2014, we completed 1,674,713 periodic CDRs to ensure that only those beneficiaries who remain disabled continue to receive monthly benefits. Of this total, we completed 525,875 full medical CDRs, despite handling a near record number of initial disability claims receipts.

We prioritized the cases that were most likely to have medical improvement so that we used our limited resources on the CDRs with the best rate of return. Based on these reviews in FY 2014, we made initial determinations that benefits should be ceased in 139,204 cases, most due to medical improvements and the ability to work. Our Office of the Chief Actuary estimates that, after all appeals, we will cease paying benefits to 92,727 individuals and their eligible dependents. We estimate the present value of future benefits saved for the Old-Age, Survivors, and Disability Insurance (OASDI), Supplemental Security Income (SSI), Medicare, and Medicaid programs to be \$9 billion.

Our periodic CDR process consistently yields a favorable ratio of savings-to-costs. We estimate that the CDR process yielded a savings-to-costs ratio averaging \$11.2 to \$1 for FYs 1997 through 2013. For FY 2014, we estimate that the CDR process yielded a savings-to-costs ratio of \$14.1 to \$1. The higher savings-to-costs ratio for FY 2014 is attributable to a variety of factors, including changes in the specific mix of CDR cases conducted, revised economic assumptions, refinements in the models used to estimate the CDR benefit savings, and variation in the cost of conducting these reviews.

The Bipartisan Budget Act (BBA) of 2015 (Public Law 114-74, 129 Stat. 584) includes a provision that authorizes a stream of funding for our agency, which would enable us to significantly expand our program integrity work. If the additional funding were provided to us by future appropriations, the resources would enable us to conduct many more full medical CDRs, and thus help ensure that only those individuals eligible for OASDI and SSI disability benefits continue to receive them. Based on the high savings-to-costs ratio yielded from conducting medical CDRs, the BBA funding will help us to continue to yield a significant positive return on that investment.

Page 2 – The Honorable Joseph R. Biden, Jr.

If you have any questions, please do not hesitate to contact me or have your staff contact Judy Chesser, our Deputy Commissioner for Legislation and Congressional Affairs, at (202) 358-6030.

I am also sending this information to the Speaker of the House of Representatives.

Sincerely,

Carolyn W. Colvin
Acting Commissioner

SOCIAL SECURITY

The Commissioner

December 19, 2016

The Honorable Paul Ryan
Speaker of the House
of Representatives
Washington, DC 20515

Dear Mr. Speaker:

We enclose our report on continuing disability reviews (CDR) for fiscal year (FY) 2014. In FY 2014, we completed 1,674,713 periodic CDRs to ensure that only those beneficiaries who remain disabled continue to receive monthly benefits. Of this total, we completed 525,875 full medical CDRs, despite handling a near record number of initial disability claims receipts.

We prioritized the cases that were most likely to have medical improvement so that we used our limited resources on the CDRs with the best rate of return. Based on these reviews in FY 2014, we made initial determinations that benefits should be ceased in 139,204 cases, most due to medical improvements and the ability to work. Our Office of the Chief Actuary estimates that, after all appeals, we will cease paying benefits to 92,727 individuals and their eligible dependents. We estimate the present value of future benefits saved for the Old-Age, Survivors, and Disability Insurance (OASDI), Supplemental Security Income (SSI), Medicare, and Medicaid programs to be \$9 billion.

Our periodic CDR process consistently yields a favorable ratio of savings-to-costs. We estimate that the CDR process yielded a savings-to-costs ratio averaging \$11.2 to \$1 for FYs 1997 through 2013. For FY 2014, we estimate that the CDR process yielded a savings-to-costs ratio of \$14.1 to \$1. The higher savings-to-costs ratio for FY 2014 is attributable to a variety of factors, including changes in the specific mix of CDR cases conducted, revised economic assumptions, refinements in the models used to estimate the CDR benefit savings, and variation in the cost of conducting these reviews.

The Bipartisan Budget Act (BBA) of 2015 (Public Law 114-74, 129 Stat. 584) includes a provision that authorizes a stream of funding for our agency, which would enable us to significantly expand our program integrity work. If the additional funding were provided to us by future appropriations, the resources would enable us to conduct many more full medical CDRs, and thus help ensure that only those individuals eligible for OASDI and SSI disability benefits continue to receive them. Based on the high savings-to-costs ratio yielded from conducting medical CDRs, the BBA funding will help us to continue to yield a significant positive return on that investment.

Annual Report
on
Medical Continuing Disability Reviews

Fiscal Year 2014

ANNUAL REPORT ON MEDICAL CONTINUING DISABILITY REVIEWS FISCAL YEAR 2014

Overview

We perform medical continuing disability reviews (CDR) to determine if disabled beneficiaries still meet the medical requirements for eligibility. We conduct two types of medical CDRs: full medical reviews and mailers. Using computer-scoring models, we identify cases for which there is a lower likelihood of demonstrating medical improvement. In those cases, we send a questionnaire (mailer) to the beneficiary in order to obtain additional information, which we then use to determine if a full medical review is appropriate. Full medical reviews are expensive because each one requires a new medical evaluation and disability determination.

In fiscal year (FY) 2014, we spent \$638 million to complete 1,674,713 periodic CDRs. Of this total, we completed 1,148,838 mailer CDRs. We also completed 525,875 full medical reviews that resulted in 139,204 decisions to cease benefit payments, most due to medical improvement and the ability to work. Our Office of the Chief Actuary (OCAct) estimates that, after all appeals, we will cease paying benefits to 92,727 individuals, along with their eligible dependents. OCAct also estimates that the periodic CDRs completed in FY 2014 will result in a present value of \$9 billion in lifetime program benefits saved. For FY 2014, the estimated ratio of net program savings to administrative costs is approximately \$14.1 to \$1.

Statutory Requirements

Section 221(i) of the Social Security Act (Act) requires an annual report to Congress on:

- periodic CDRs on Old-Age, Survivors, and Disability Insurance (OASDI) beneficiaries as mandated by the Social Security Disability Amendments of 1980; and
- determinations that the Commissioner of Social Security has made to waive the requirement that we review the continuing eligibility of disability beneficiaries with nonpermanent disabilities at least once every 3 years.

This report fulfills the statutory reporting requirements regarding periodic CDRs for FY 2014. We also are reporting on periodic CDRs for Supplemental Security Income (SSI) recipients. Section 1614(a) (4) of the Act gives us discretionary authority to conduct periodic CDRs on SSI recipients. On September 28, 1994, we issued a Federal Register notice that we would begin conducting periodic SSI CDRs on October 1, 1994.

In addition, we provide: (1) data and information on periodic CDRs processed in FY 2014 in Appendix A; (2) historical data and information on periodic CDRs in Appendix B; (3) estimated benefit savings resulting from periodic CDRs completed in FY 2014 in Appendix C; (4) data on CDRs initiated as the result of work and reported earnings in Appendix D; and (5) a summary of CDR legislation in Appendix E.

The CDR Process

We conduct periodic CDRs to ensure that only those beneficiaries who remain disabled continue to receive monthly benefits. For case reviews that we initiate centrally when a medical review diary matures, we conduct periodic CDRs using one of two methods. We send some cases to the State disability determination services (DDS) for a full medical review; we complete others using the mailer process.¹

We decide whether to initiate a full medical review or send a mailer after profiling all cases to identify the likelihood of medical improvement. We send cases with a higher likelihood of medical improvement to DDSs for full medical reviews. For those cases with a lower likelihood of medical improvement, we send mailers to obtain more information from the beneficiaries, which we evaluate to determine if there is any indication of medical improvement. If we find an indication of medical improvement, we send the case to a DDS for a full medical review. Otherwise, we set a new medical review diary and schedule the case for a future CDR.

We conduct some CDRs outside the centralized process based on events such as voluntary or third-party reports of medical improvement. We always send these CDRs to the DDSs for a full medical review. In addition, there is a subset of cases where the medical review diary matures but we curtail further development for technical reasons, such as the suspension or termination of benefits for non-medical reasons. We refer to these cases as “administrative closures.”

FY 2014 CDR Workload

In FY 2014, we completed 1,674,713 periodic CDRs, which resulted in 136,163 initial cessations and 3,041 terminations due to beneficiaries’ failure to cooperate (FTC) in the field office (FO) CDR process. Of the total 1,674,713 CDRs, we initiated 1,648,537 reviews under our centrally initiated review process. Of the 3,041 beneficiaries we terminated because of FO FTC, 2,905 were from centrally initiated CDRs and 136 from outside the centralized process. For determining cost effectiveness, we consider only those cases initiated under our centralized release process.

We released approximately 1.3 million CDR mailers. After reviewing profile data and the mailer responses, we completed 1,148,838 mailers, deferring a full medical review. We referred the cases we could not complete under the mailer process because of an indication of medical improvement to the DDSs for a full medical review.²

We completed 522,834 full medical CDRs. Of this total, we completed 496,794 centrally initiated reviews, 13,972 reviews initiated outside of our centralized process and 12,068 administrative closures.

¹ At this time, we do not use the mailer process for SSI disabled children.

² We did not work all mailers released in FY 2014. Because of the time needed to complete a case, we worked some mailers released in FY 2013, and some mailers released in FY 2014 were pending at the end of the fiscal year. We will report these cases in future reports.

We issued initial cessation determinations for 132,405 individuals or approximately 8 percent of the 1,648,537 centrally initiated reviews. We also terminated benefits in 2,905 FO FTC cases. OCA estimates that, after all appeals, these decisions will result in termination of benefits for 92,727 individuals.

The table in Appendix A shows a breakout by program of periodic CDRs processed in FY 2014 by mailer or full medical review, initial cessations, initial FO FTC terminations, estimated cessations after all appeals, estimated final FO FTC terminations, and estimated total final cessations and terminations after all appeals. See Appendix B for additional information on the results of periodic centrally initiated CDRs.

Section 221(i) (2) of the Act authorizes the Commissioner to waive the requirement to conduct legislatively mandated periodic CDRs on a State-by-State basis after consultation with the State DDS. A waiver in this context refers to our administrative discretion to determine the appropriate number of cases we will review on a State-by-State basis.³

In determining the appropriate number of CDR cases to review, we consider the backlog of pending reviews, the projected number of new disability applications, the projected staffing levels in each DDS, and the availability of medical consultants and other resources. Thus, our annual budget request, related performance documents, and annual Congressional Operating Plan include the number of CDRs we can complete with the resources we receive. The FY 2014 budget restricted us from initiating approximately 900,000 CDRs that were available for initiation in that fiscal year (i.e., those with a matured medical review diary).

Estimated Savings

For the estimated 92,727 final cessations, resulting from centrally initiated periodic CDRs in the DDSs and FOs, we estimate:

- Over the period FY 2013-FY 2023, net benefit reductions for the OASDI, SSI, Medicare, and Medicaid programs will be about \$6.7 billion;
- The present value of future net benefits saved for the OASDI, SSI, Medicare, and Medicaid programs is \$9 billion; and
- Net savings for the 25-year and 75-year periods to be less than 0.005 percent of taxable payroll for the OASDI and Medicare programs.

We provide year-by-year estimates and estimates by program in Appendix C. These estimates do not include savings from an additional 3,758 initial DDS cessations resulting from 13,972 CDRs we did not initiate centrally, or from 136 FO terminations that resulted from FO FTC determinations for CDRs that we did not initiate centrally.

³ 20 C.F.R. §§ 404.1590(g), 416.990(g).

Cost Effectiveness

For FY 2014, the estimated ratio of program savings to administrative costs is approximately \$14.1 to \$1. We calculate this ratio by dividing the estimated present value of total lifetime benefits saved from periodic CDR cessations \$9 billion, (including OASDI, SSI, Medicare, and Medicaid savings) by the \$638 million we spent to conduct periodic CDRs in FY 2014. However, we consider this an approximation of the actual savings-to-cost ratio because the actual administrative costs associated with these savings will differ somewhat from the FY 2014 administrative expenditures on CDRs. For example, actual costs would include costs of appeals completed after FY 2014 and exclude costs of appeals completed in FY 2014 for cases initially ceased prior to FY 2014.

As we have reported to the Congress every year since 1997, our periodic CDR process has consistently yielded a favorable estimated ratio of benefit savings to administrative costs, although those estimated savings-to-cost ratios have varied over time. That variation is the result of changes in the costs of conducting CDRs and our estimates of the resulting benefit savings. The costs depend on the number of CDRs actually conducted in a given year, but also upon efficiencies gained by the institution of a profiling process that enables us to focus on the cases most likely to result in a termination. The benefit savings also depend upon the number of CDRs conducted, but also depend critically on the distribution of the types of cases (e.g., OASDI vs. SSI; SSI adult vs. SSI children).

Prior to the implementation of the current CDR profiling process for case selection and the addition of SSI-only cases to the CDR process, we estimated that we achieved \$3 in OASDI and Medicare program savings for each \$1 in administrative costs invested in full medical CDRs. We estimated that the addition of the mailer process in 1993 doubled this ratio to approximately \$6 to \$1. Beginning in 1996, with the addition of many more SSI-only cases to the CDR workload, the provision for special funding to complete CDRs,⁴ and accounting for the Federal share of Medicaid savings that result from conducting CDRs on SSI recipients, the estimated savings-to-cost ratios have averaged slightly over \$11.2 to \$1. Since the supplemental administrative funding expired at the end of FY 2002, constraints on administrative resources have hampered the timely review of all CDRs coming due, and the savings-to-cost ratios have varied in part due to the changing mix of cases.

The \$14.1 to \$1 savings-to-cost ratio we are reporting for FY 2014 is roughly in line with the measured CDR cost-effectiveness levels reported in the past several years. The change from prior reported estimates is due to a combination of factors, including changes in the specific mix of CDR cases conducted, revised economic assumptions, refinements in the models used to estimate the CDR benefit savings, and variation in the cost of conducting these reviews.

⁴ Public Law (P.L.) 104-121, the Contract with America Advancement Act of 1996, enacted on March 29, 1996, provided for an adjustment in the discretionary spending caps to increase funding for periodic CDRs for FY 1996 through FY 2002.

Quality Assurance

During FY 2014, our Quality Assurance (QA) review of 20,485 periodic CDRs handled by the DDSs showed an overall performance accuracy rate for continuances and cessations of 97.6 percent. Specifically, FY 2014 QA reviews reflect the following:

QA Review Results		
Program	Number Reviewed	Accuracy Rate
OASDI only	7,907	97.6
SSI only	10,452	97.8
Concurrent (both OASDI and SSI)	2,126	97.1

Conclusion

During the past 19 fiscal years, we completed 25.2 million periodic CDRs. For part of this 19-year period, we completed large numbers of backlogged periodic CDRs in order to become current with our periodic CDR workload by the end of FY 2002. We met this objective without significantly affecting other key workloads because Congress provided additional funding for periodic CDRs outside the discretionary spending caps from FY 1996 to FY 2002. In addition, we made improvements in the periodic CDR profiling process, resulting not only in an increased number of periodic CDRs processed by mailers, but also in the ability to prioritize the initiation of full medical reviews because resources do not permit doing reviews in all cases when the medical review diary matures.

Since FY 2002, yearly funding constraints result in our completion of fewer CDRs than could be scheduled based on matured medical review diaries. As a result, we again face a significant CDR backlog. In order to address this backlog and complete future CDRs as they come due, we need sustained adequate funding.

The Bipartisan Budget Act (BBA) of 2015⁵ includes a provision that authorizes a stream of funding for our agency, which would enable us to significantly expand our program integrity work. If that funding were provided to us by future appropriations, the resources would enable us to conduct many more full medical CDRs, and thus help ensure that only those individuals eligible for OASDI and SSI disability benefits continue to receive them. Based on the high savings-to-costs ratio yielded from conducting medical CDRs, the BBA funding will help us to continue to yield a significant positive return on that investment.

a Beneficiaries who failed to comply with our field office's (FO) request for necessary information during the CDR have had their eligibility for disability benefits terminated after 12 consecutive months of suspension for non-compliance. We report failure-to-cooperate (FTC) events that occur after the reviews are underway in the full medical review column.

b Old-Age, Survivors, and Disability Insurance (OASDI) program under title II of the Social Security Act.

c Other periodic CDR cases are reviews initiated for reasons other than the maturing of a medical review diary. Examples of such cases are voluntary beneficiary/recipient reports or third party reports indicating that the individual may no longer be disabled.

d Due to the unavailability of appellate information for the other periodic CDRs, we have not estimated final cessations.

e Administrative closures are cases initiated as periodic CDRs, but for which we curtailed development for technical reasons, such as the suspension or termination of benefits for other reasons, including the death of the beneficiary.

HISTORICAL EXPERIENCE UNDER THE CONTINUING DISABILITY REVIEW PROCESS

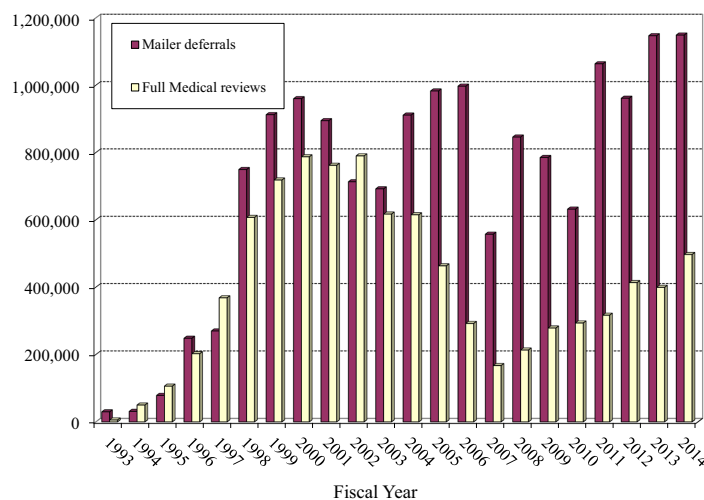

Following enactment of the Social Security Disability Amendments of 1980, section 221(i) of the Social Security Act (Act) generally requires us to review the continuing eligibility of disabled beneficiaries entitled to benefits under the Old-Age, Survivors, and Disability Insurance (OASDI) programs (title II of the Act) at least once every 3 years. A similar requirement was not established at that time for disabled Supplemental Security Income (SSI) recipients under title XVI of the Act. Although the Committee on Finance of the Senate stated in its report on this legislation that we should apply the same continuing disability review (CDR) procedures with respect to both the OASDI and SSI programs, the Act does not specifically require SSI adult CDRs similar to OASDI. The Act, however, does mandate certain types of SSI reviews including: (1) using adult eligibility criteria to redetermine the eligibility of all SSI child recipients who reach age 18; and (2) conducting CDRs for SSI low-birth-weight children not later than 12 months after birth. Under both the OASDI and SSI programs, we cannot initiate CDRs for individuals actively participating in certain return to work programs.

In order to handle the large CDR workload mandated under these various provisions, beginning in 1993 we developed a procedure to screen certain cases scheduled for a CDR using the results of a profiling process including a mailer questionnaire for some cases. Table B1 indicates the numbers of cases for which we completed a scheduled CDR with a mailer questionnaire that resulted in the deferral of a full medical review. These numbers of mailer deferrals are shown graphically, along with the annual number of all centrally initiated full medical reviews, in figure B1. In 2007, we implemented a streamlined failure to cooperate (FTC) process for medical CDRs. Under this process beneficiaries who fail to comply with field office requests for information necessary for completing their medical CDRs have their benefits suspended. Subsequently, we terminate their eligibility for disability benefits after 12 consecutive months of suspension of benefits for noncompliance. The streamlined FTC process resulted in the initial termination of 2,905 centrally initiated medical CDRs in fiscal year (FY) 2014.

Table B1.—Cases for Which a Full Medical Review Was Deferred Based on the Results of the Mailer Profile Process

Fiscal year	Title II	Title XVI	Total
1993	29,691	—	29,691
1994	30,995	—	30,995
1995	78,435	—	78,435
1996	191,738	56,290	248,028

2011	889,284	174,121	1,063,405
2012	711,643	249,426	961,069
2013	939,470	207,477	1,146,947
2014	889,603	259,235	1,148,838

Figure B1.—Periodic CDRs Processed in FYs 1993-2014^a

^a Excludes 2,905 FTC terminations processed in FY 2014.

Tables B2-B6 present the latest available summary of results on centrally initiated full medical reviews performed under titles II and XVI since 1993. We tabulate the data shown in these tables on a cohort basis by the date of initial decision. In particular the tables do not include:

- administrative closures—cases for which we curtail development for technical reasons;
- CDRs initiated as the result of work activity on the part of the beneficiary/recipient; and
- miscellaneous other CDRs processed by the State disability determination services (DDS) but not as part of the centrally initiated CDR scheduling process (e.g., voluntary and third-party reports of medical improvement, post-transplant end-stage renal disease cases, and vocational rehabilitation reports).

Table B2.—Title II Disabled Worker Reviews: Disposition^a of Medical Continuing Disability Reviews by Fiscal Year of Initial Decision, Level of Decision, and Program Involvement

Fiscal year of initial DDS decision	Initial decisions						
	Total initial DDS decisions	Continuations		Cessations		Appeals to reconsideration	
		Number	Percent ^b	Number	Percent ^b	Number	Percent ^c
Title II only reviews

^a Data reflect results as of February 2015. The ultimate numbers of continuations and cessations are subject to change until all appeals are final.

^b Percentage of decisions at this level.

^c Percentage of cessations at this level appealed to next level.

^d We do not reflect the status and disposition of cases in the Federal courts here. However, we have included information on the status and disposition at the Office of Disability Adjudication and Review (ODAR) for cases remanded to us by the courts. The excluded experience in the Federal courts has a minimal impact on the number of continuations.

^e Number of persons appealing beyond the reconsideration level.

^f Less than 0.05 percent.

Source: Social Security Administration, Office of Operations.

^a Data reflect results as of February 2015. The ultimate numbers of continuations and cessations are subject to change until all appeals are final.

^b Percentage of decisions at this level.

^c Percentage of cessations at this level appealed to next level.

^d We do not reflect the status and disposition of cases in the Federal courts here. However, we have included information on the status and disposition at ODAR for cases remanded to us by the courts. The excluded experience in the Federal courts has a minimal impact on the number of continuations.

^e Number of persons appealing beyond the reconsideration level.

^f Less than 0.05 percent.

**ESTIMATED FEDERAL BENEFIT SAVINGS FROM PERIODIC CONTINUING DISABILITY
REVIEW INITIAL CESSATIONS IN FISCAL YEAR 2014**

This appendix presents estimates of Federal benefit savings expected to ultimately ensue from continuing disability reviews (CDR) that: (1) we initiated centrally; and (2) which resulted in an initial cessation or an initial field office (FO) failure-to-cooperate (FTC) termination in fiscal year (FY) 2014. Table C1 provides actual numbers of such initial cessations/terminations, along with the estimated numbers of such cessations/terminations that will ultimately result in termination of disability benefits. The totals in the table are disaggregated according to whether the reviews were initiated under the Old-Age, Survivors, and Disability Insurance (OASDI) programs (title II of the Social Security Act (Act)) or under the Supplemental Security Income (SSI) program (title XVI of the Act). The estimates of ultimate cessations/terminations reflect all information on the status of appeals of these initial cessations/terminations as of February 2015 as well as estimates of the final disposition of such cases as based on the latest information concerning appeal and reversal rates at various stages of the appeals process.

**Table C1.—Cessations/Terminations Resulting From Periodic Continuing
Disability Reviews Initiated Centrally^a**

CDR cessations/terminations	CDRs initiated under title II			CDRs initiated under title XVI	Total
	Title II only reviews	Title II reviews involving title XVI recipients	Subtotal, title II		
Cessations from full medical reviews					
Initial cessations in FY 2014	25,654	8,922	34,576	97,829	132,405
Estimated ultimate cessations (after all appeals) resulting from initial cessations shown on previous line.	12,072	4,508	16,580	73,303	89,883
FO FTC terminations					
Initial FTC terminations in FY 2014	985	323	1,308	1,597	2,905
Estimated final FTC terminations after all appeals	953	306	1,259	1,585	2,844
Estimated total final cessations/terminations . . .	13,025	4,814	17,839	74,888	92,727

^a Does not include work CDRs or other CDRs initiated outside of the Social Security Administration's centralized process for initiating CDRs.

Table C2 presents estimates of the Federal benefit savings resulting from CDRs for which initial cessations or initial FO FTC terminations of disability benefits occurred in FY 2014. We base these savings on the estimates of ultimate cessations/terminations that will remain after the appeals process is complete, as shown in table C1. We present the estimated CDR savings in table C2 for: (1) the OASDI program; (2) the SSI program; (3) the Medicare programs; and (4) the Medicaid program. The estimated savings for the Medicare programs include savings under the Hospital Insurance (HI) program and Parts B & D of the Supplementary Medical Insurance (SMI) program.

Table C2 displays the estimated benefit savings in three ways. First, we show the reductions in benefit payments for each fiscal year from 2013 through 2023. Second, we present medium-range (25-year) and long-range (75-year) savings for the programs financed by payroll taxes. We express these estimates as a percent of taxable payroll, and each is in the "negligible" range (i.e., less than 0.005 percent of taxable payroll). The third set are estimates of the present value of Federal benefits saved because of the CDRs, valued as of September 30, 2014. These estimates may be thought of as the amount of money as of September 30, 2014 that, together with earned interest, would be just sufficient to pay the estimated amount of benefits that will not be payable because of the CDRs.

We base all estimates on the intermediate assumptions of the 2015 Trustees Reports and the assumptions used for the 2015 SSI Annual Report. The Office of the Chief Actuary, Social Security Administration, prepared the estimates of OASDI and SSI savings. The Office of the Actuary, Centers for Medicare & Medicaid Services, prepared the Medicare and Medicaid estimates.

Table C2.—Estimated Federal Benefit Savings From Periodic Medical Continuing Disability Reviews Initiated Centrally^a With Initial Cessations and Initial FO FTC Terminations in FY 2014 by Program

Fiscal year	Program						Total
	OASDI	SSI ^b	Medicare			Medicaid ^b	
			HI	SMI-Part B ^c	SMI-Part D ^c		
A. Estimated amount of reduction in benefit payments (in millions)							
2013 ^d	\$4	\$4	—	—	—	^e	\$8
2014	61	106	\$12	\$9	\$10	\$13	210
2015	172	391	37	28	32	2	661
2016	220	522	49	39	43	-6	867
2017	220	461	50	38	46	-10	804
2018	203	402	46	36	44	2	733
2019	187	409	44	35	43	15	732
2020	180	385	43	35	43	18	705
2021	175	359	43	36	43	19	674
2022	169	361	43	36	43	18	669
2023	162	316	42	35	43	17	616
11-year total	1,752	3,714	409	327	389	89	6,680
B. Estimated medium-range (25-year) and long-range (75-year) savings (as a percent of taxable payroll ^f)							
25-year: 2014-38	^g /	—	^g /	—	—	—	—
75-year: 2014-89	^g /	—	^g /	—	—	—	—
C. Present value of estimated lifetime benefits saved, as of the end of fiscal year 2014 (in millions)							
	2,444	4,526	648	595	661	150	9,023

^a We base the savings estimates on the 132,405 initial cessations and 2,905 initial FO FTC terminations from CDRs initiated centrally for which we have demographic, appellate, and benefit information. In particular, the estimates do not include savings for 3,758 initial cessations and 136 initial FO FTC terminations generated outside of the centrally initiated CDR scheduling process (e.g., voluntary or third-party reports of medical improvement) for which we have no such information.

^b For the SSI and Medicaid programs, the savings are the Federal share of total benefit savings. Under the Affordable Care Act (ACA), SSI disabled children and disabled adults who would lose their categorical eligibility for Medicaid due to a CDR termination will continue to receive Medicaid beginning January 1, 2014 if their family income is less than 138 percent of the Federal poverty level and their State of residence has elected to expand Medicaid coverage to this level of poverty. For disabled adults qualifying for Medicaid under that ACA provision, the Federal matching rate for their Medicaid costs will be significantly higher than the regular Medicaid matching rate, resulting in increased Federal costs attributable to those CDR terminations.

^c For the SMI program, the savings are the net effect of a reduction in benefit payments and a reduction in premium receipts.

^d Estimated savings in FY 2013 are attributable to the FO FTC terminations. The initial FO terminations in FY 2014 had payments suspended in FY 2013 due to an FTC with the FO in a CDR.

^e Between -\$0.5 million and \$0.5 million.

^f We present medium-range and long-range savings for those programs financed by payroll taxes. Includes estimated savings from suspended payments in FY 2013 attributable to FO FTC terminations in FY 2014.

^g Less than 0.005 percent.

Notes:

1. We base the estimates on the intermediate assumptions from the 2015 Trustees Reports and assumptions underlying the 2015 SSI Annual Report.
2. Federal SSI payments due on October 1st in FYs 2017, 2018, 2023, and 2024 are included with payments for the prior year.
3. The Office of the Chief Actuary in the Social Security Administration provided the estimates shown in the above table for savings in the OASDI and SSI programs. The Office of the Actuary in the Centers for Medicare & Medicaid Services provided the corresponding estimates for savings in the Medicare and Medicaid programs.
4. Totals may not equal sum of components due to rounding.

**CONTINUING DISABILITY REVIEWS
RESULTING FROM WORK ACTIVITY**

Work continuing disability reviews (CDR) are different from the medical CDRs that are the focus of this report. Work CDRs evaluate whether a Social Security Disability Insurance (SSDI) beneficiary is engaging in substantial gainful activity (SGA) after the trial work period (TWP). Reports of work and earnings trigger work CDRs.

The definition of disability involves the inability to engage in SGA. SSDI beneficiaries must report any changes in work activity, and we must determine whether such work constitutes SGA. Additionally, our Continuing Disability Review Enforcement Operation (CDREO) is an automated process that identifies work activity by matching earnings reported to the Internal Revenue Service and posted to our Master Earnings File with the information in our other records.

When we learn of work activity, we analyze the work to determine if we must investigate further. Many work reports and CDREO alerts may not require a work CDR because the work occurs during the TWP. In addition, many CDREO alerts may identify payments that are not earnings from work activity (e.g., sick pay or long-term disability benefits); these payments also do not require a work CDR.

In fiscal year (FY) 2014, we completed **247,215** work CDRs. The results of those work CDRs are displayed in the table below. A work CDR may result in a determination that disability has ceased because earnings constitute SGA for at least one month after the TWP or a determination that disability continues because earnings do not constitute SGA.

Work CDRs in FY 2014	
Work CDRs completed during FY 2014.....	247,215
Reviews resulting in a finding of cessation of disability, or a subsequent reinstatement or suspension of benefits in the extended period of eligibility.....	118,030
Review resulting in no cessation of disability	129,185

**SUMMARY OF RELEVANT LEGISLATION FOR
FY 2014 CDR ANNUAL REPORT TO CONGRESS**

LEGISLATION	DATE ENACTED	PROVISIONS	PROGRAM
<i>Section 1614(a)(4) of the Social Security Act (P.L. 92-603)</i>	October 30, 1972	<ol style="list-style-type: none"> 1.) Gives SSA the discretionary authority to conduct CDRs on SSI recipients. 2.) On September 28, 1994, SSA issued a <u>Federal Register</u> notice that periodic SSI CDRs would begin on October 1, 1994. 	SSI
<i>Section 221(i) of the Social Security Act (P.L. 97-455)</i>	Act amended January 1983	<p>Requires SSA to submit an annual report to Congress on:</p> <ol style="list-style-type: none"> 1.) Periodic CDRs mandated by the <i>Social Security Disability Amendments of 1980</i>; and 2.) Determinations that the Commissioner of Social Security made to waive the requirement that continuing eligibility of disability beneficiaries with nonpermanent disabilities be reviewed at least once every 3 years. 	DI
<i>Social Security Independence and Program Improvements Act of 1994 (P.L. 103-296)</i>	August 15, 1994	<p>Requires SSA to:</p> <ol style="list-style-type: none"> 1.) Conduct medical reviews on at least one-third of individuals attaining age 18 each year during Fiscal Year (FY) 1996-1998. This provision was repealed by P.L. 104-193. 2.) Perform CDRs for a minimum of 100,000 Supplementary Security Income (SSI) recipients during each of FYs 1996, 1997, and 1998. 3.) Report activities on these provisions to the House Committee on Ways and Means and the Senate Committee on Finance no later than October 1, 1998.¹ 	SSI
<i>Contract with America Advancement Act of 1996 (P.L. 104-121)</i>	March 29, 1996	<ol style="list-style-type: none"> 1.) Provides for an adjustment in the discretionary spending caps for increase funding for CDRs for FY 1996, \$260 million; for FY 1997, \$360 million; for FY 1998, \$570 million; and for FY 1999 through FY 2002, \$720 million annually. 	DI/SSI

¹ SSA submitted this information in the FY 1997 CDR Report to Congress released to Congress on August 25, 1998.

LEGISLATION	DATE ENACTED	PROVISIONS	PROGRAM
		2.) Requires a Report to Congress annually for FYs 1996 through 2002 on the amount of money spent on CDRs, the number of reviews conducted (by category), the disposition of such reviews (by program) and the estimated savings (by program) over the short-, medium-, and long-term.	
<i>Personal Responsibility and Work Opportunity Reconciliation Act of 1996</i> <i>(P.L. 104-193)</i>	August 22, 1996	Requires SSA to: <ol style="list-style-type: none"> 1.) Redetermine the eligibility of SSI beneficiaries using adult initial criteria during the 1-year period beginning with the beneficiary's 18th birthday. (Modified by P.L. 105-33) 2.) Perform a CDR not later than 12 months after birth for recipients whose low birth weight is a contributing factor material to the determination of their disability. (Modified by P.L. 105-33) 3.) Conduct CDRs for SSI recipients under age 18 with non-permanent disabilities at least every 3 years. Representative payees of these recipients must present evidence that the child is, and has been, receiving treatment considered medically necessary and available. <p>The legislation authorized \$150 million in FY 1997 and \$100 million in FY 1998 in additional funds to assist with these additional mandates.</p>	SSI
<i>Balance Budget Act of 1997</i> <i>(P.L. 105-33)</i>	August 5, 1997	<ol style="list-style-type: none"> 1.) Provides SSA with the authority to make redeterminations of disabled childhood recipients who attain age 18, using the adult eligibility criteria, more than 1 year after the date such recipient attains age 18. 2.) Permits SSA to schedule a CDR for low birth weight babies at a date after the first birthday if the Commissioner determines the impairment is not expected to improve within 12 months of the child's birth. 	SSI

LEGISLATION	DATE ENACTED	PROVISIONS	PROGRAM
<i>Ticket to Work and Work Improvement Act of 1999 (P.L. 106-170)</i>	December 17, 1999	1.) Prohibits the Commissioner from initiating CDRs during the period a beneficiary is using (as defined by the Commissioner) a Ticket to Work and Self-Sufficiency. 2.) Effective January 1, 2002, prohibits the Commissioner from scheduling medical CDRs due solely to an individual's work activity after the individual has been receiving benefits for 2 years. An individual will still be subject to regularly scheduled CDRs not triggered by work. Work activity will still be evaluated to determine eligibility for cash benefits.	DI/SSI
