- a. Monthly benefit reduced by amount of any government pension excluding workers' compensation benefits and veterans' compensation for service-connected disability or death. Not available for persons receiving assistance.
- b. Provision for future automatic cost-of-living adjustments (COLAs).
- c. Suspended by legislation in 1973.
- d. Beginning June 1975, subject to automatic COLAs. Benefits no longer available to persons receiving payments under the Supplemental Security Income program.
- e. Separate rate for couples eliminated. Rate for individuals applied to all beneficiaries.
- f. Effective for applications after November 5, 1990.
- g. The COLA for December 1999 was originally determined to be 2.4 percent, based on the Consumer Price Index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to Public Law 106-554, benefits were calculated and paid in August 2001 and later as if the COLA for December 1999 had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.
- h. Social Security Administration records show no surviving special age-72 (Prouty) beneficiaries in current-payment status in December 2011.

NOTES: Benefit first available at age 62 to female workers effective November 1956 and to male workers effective August 1961.

... = not applicable.

- a. Assumes the worker began to work at age 22, retired at the beginning of the year, had no prior disability, and received the maximum reduction. Through 1999, the assumed reduction was 36 months at 5/9 of 1 percent per month, or 20 percent. In 2000, with the increase in the full retirement age (FRA) to 65 and 2 months, the reduction increased to 20.008333 percent (see Tables 2.A17.1 and 2.A20). In 2001, the FRA increased to 65 and 4 months for a maximum reduction of 21.666667 percent. In 2002, the FRA increased to 65 and 6 months for a maximum reduction of 22.5 percent. In 2003, the FRA increased to 65 and 8 months for a maximum reduction of 23.333333 percent. In 2004, the FRA increased to 65 and 10 months for a maximum reduction of 24.166667 percent. In 2005, the FRA increased to 66 for a maximum reduction of 25 percent.
- b. Final benefit amount payable after Supplementary Medical Insurance (SMI) premium or any other deduction is rounded to next lower \$1.
- c. Effective February 1968.
- d. Derived from transitional guarantee computation based on primary insurance amount (PIA) table of 1978.
- e. In 1981, legislation eliminated the minimum PIA for workers who attain age 62 in 1982 or later. (The minimum is retained until 1991 for members of religious orders who were under a vow of poverty, provided that the order had elected Social Security coverage before December 29, 1981.)
- f. The cost-of-living adjustment (COLA) for December 1999 was originally determined to be 2.4 percent, based on the Consumer Price Index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI. Pursuant to Public Law 106-554, benefits were calculated and paid in August 2001 and later as if the COLA for December 1999 had been 2.5 percent. Affected beneficiaries received a one-time payment to cover the shortfall that occurred before August 2001.

- a. Through 2002, assumes that the worker began to work at age 22, retired at the beginning of the year with unreduced benefits, had no earnings after retirement, and had no prior period of disability. Effective 2003, the same assumptions apply except that the benefit is reduced by 2 months because, for a worker retiring at age 65 in 2003, the age at which one can receive an unreduced benefit—the full retirement age (FRA)—has been raised from 65 to 65 and 2 months. In 2004, the FRA is 65 and 4 months, so the benefit is reduced by 4 months. In 2005, the FRA is 65 and 6 months, so the benefit is reduced by 6 months. In 2006, the FRA is 65 and 8 months, so the benefit is reduced by 8 months. In 2007, the FRA is 65 and 10 months, so the benefit is reduced by 10 months. Beginning in 2008, the FRA is 66, so the benefit is reduced by 12 months.
- b. Final benefit amount payable after Supplementary Medical Insurance (SMI) premium or any other deduction is rounded to next lower \$1.
- c. Effective February 1968.
- d. Derived from transitional guarantee computation based on primary insurance amount (PIA) table of 1978.
- e. In 1981, legislation eliminated the minimum PIA for workers who attain age 62 in 1982 or later. (The minimum is retained until 1991 for members of religious orders who are under a vow of poverty, provided that the order had elected Social Security coverage before December 29, 1981.)
- f. The cost-of-living adjustment (COLA) for December 1999 was originally determined to be 2.4 percent, based on the Consumer Price Index (CPI). The underlying CPI was later recomputed by the Bureau of Labor Statistics; a 2.5 percent COLA would have been consistent with the recomputed CPI.
